COMMANDOS UTILIZADOS

1

Copiar os scripts de bui

```
cp scripts/ecs/unix/build.s
```

2

Permissão o

```
chmod +x build.sh
```

3

Exec

```
fec2-user@ip-172-31-28-101 biaj$ ./build
WARNING! Your password will be stored
in plaintext in a file that can be read
by other users. Consider using the
--secret flag to provide a secret file to
configure a credential helper to remove
this warning. See
https://docs.docker.com/engine/referen
```

4

Fazen

```
fec2-user@ip-172-31-28-101 bial$ ./depl
```

5

Configurações na task definition

▼ Infrastructure requirements

Specify the infrastructure requirements

Launch type [Info](#)

Selection of the launch type will determine the

☐ AWS Fargate

Serverless compute for containers

☒ Amazon EC2 instances

Self-managed infrastructure

OS, Architecture, Network

Network mode is used for task

Operating system/Architecture

Linux/X86_64
